

2022 SEASON - FINAL FALLS REPORT
FIM MotoGP™ World Championship

The following report counts the falls divided into category, session, Event (circuits sometimes hosted more than one Grand Prix), and rider (separated by class and in total).
 The list of events with a map indicating the corners where the highest number of crashes took place and a list and graph of crashes by corner.

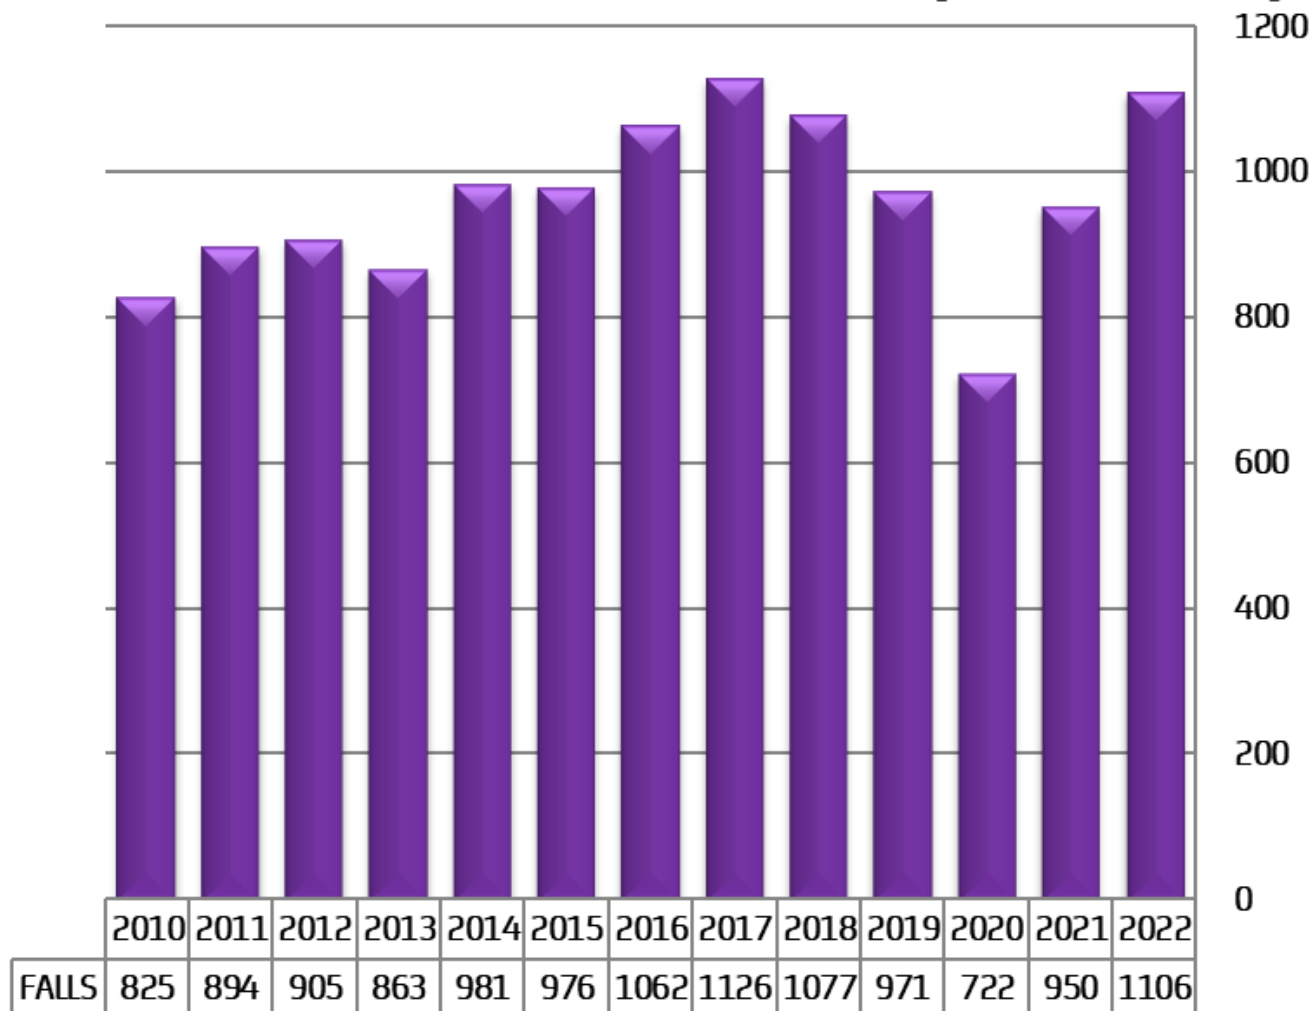

At the end you will find all the individual falls reports from each of the 20 rounds along with the injuries sustained in the crash and the specific weather conditions of the sessions. (The injuries listed in the falls reports were updated only on race day, so their complete injury description may be incomplete as riders usually underwent further medical tests outside the circuits.)
